584 South Goran, Khilgaon, Dhaka-1214

Skills and Technologies

Languages: JavaScript, TypeScript.

Frontend: React JS, Next JS, Redux, RTK query, Shadcn ui, Material UI.

Backend: Node JS, Express JS, Nest JS, MongoDB, Mongoose, Prisma, PostgreSQL, Socket IO, Redis, RabbitMQ, Elasticsearch.

Tools: GitHub, Netlify, Firebase, Supabase, Figma, Vercel, GitHub Copilot, Claude, Codex, Kiro (AI coding assistant).

Professional Work Experience

Software Engineer(Full Stack), Starconnect, Dhaka, Bangladesh,

July 2025 – Present

- Built production-grade platform using Next.js, React, TypeScript
- Achieved ~100% Lighthouse performance score.
- Collaborated with cross-functional teams to design and deliver real-time communication features, including chat, video calls, webinars, and scheduling systems.
- Contributed to backend architecture and microservices design using NestJS, RabbitMQ, Redis, and Elasticsearch to support scalable platform growth.

Full Stack Developer, IdeaChord Inc, Dhaka, Bangladesh,

July 2023 – July 2025

- Developed a scalable university student management and beneficiary fund management system using Next.js, NestJS, Prisma, and MySQL with performance and maintainability in mind.
- Built high-performance full-stack applications with optimized APIs, role-based authentication, database optimization, and responsive dashboards for administrative workflows.
- Developed multiple SaaS and business management platforms using Next.js, NestJS, Express.js, PostgreSQL, MongoDB, Prisma, and JWT authentication following modern scalable architecture practices.

Web Developer, Zivaka LLP-Kolkata, West Bengal, India

Jan 2022 – Aug 2022

- Developed scalable REST APIs using Node.js, Express.js, MongoDB, and Mongoose for business applications and management systems.
- Designed and developed a real estate business website using React.js for apartment sales, property listings, customer management, and project management workflows.
- Built responsive admin dashboards and management features to handle property updates, client interactions, and business operations efficiently.

Projects

1.StarConnect Platform (Professional Networking Platform)

[Website](#)

- Built a production-grade professional networking platform using Next.js, React, and TypeScript.
- Achieved ~100% Lighthouse performance score, significantly improving load speed and UX.
- Developed real-time communication features, including chat, video calls, webinars, and scheduling systems
- Collaborated with cross-functional teams to design scalable user interaction and networking features
- Contributed to backend architecture and microservices using NestJS, RabbitMQ, Redis, and Elasticsearch

- Worked on system design improvements to support scalable user growth and real-time data flow.
- Technology: Next.js, React, Redux, Node.js, NestJS, MySQL, Redis, RabbitMQ, Elasticsearch, JWT, Socket.IO (Pusher).

2. Library Management Website:

[Website](#) | [Front-end](#) | [Back-end](#)

- Full Stack website with JWT token-based authentication.
- Designed as a single-page application, the admin & users have different dashboards.
- Users can borrow, or request a book and the admin can manage all books and send real-time notifications to all users.

Technology: React JS, Tailwind, JWT, Socket io, Redux, Node JS, MongoDB.

Education

Noakhali Science And Technology University, BSc in Applied Mathematics,
CGPA: 3.46

2018 – 2023,

Certifications

Think in a Redux Way -Learn With Sumit

[Credential](#)
